

NGK is a nickname of ocean biz group in NICHYU GIKEN KOGYO CO.,LTD.

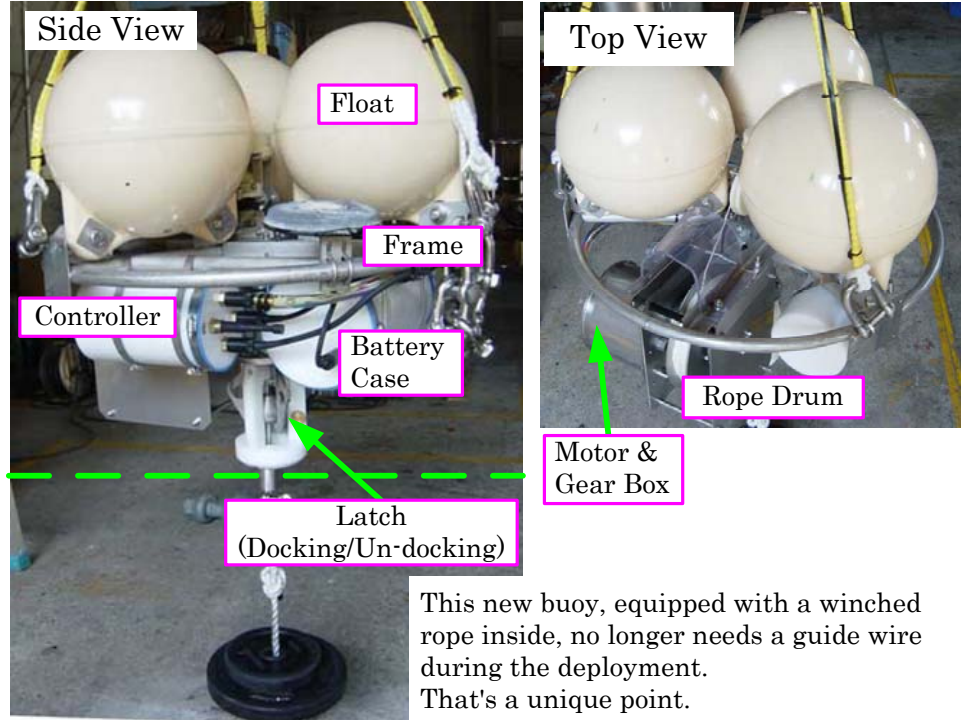

Pursuing the buoy frontiers

NGK is sending a brand-new product news including some progress and FAQs. Please let us introduce the "Self-up/down Winch-type Buoy" that will go on sale from next March.

=Product Image=

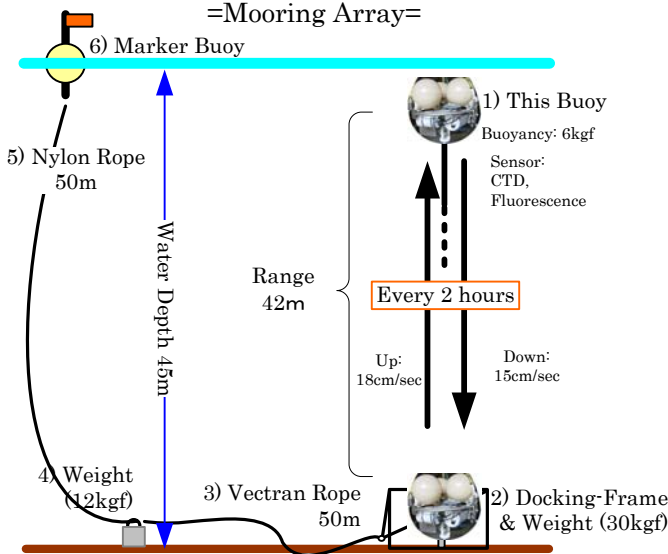

=Core Components=

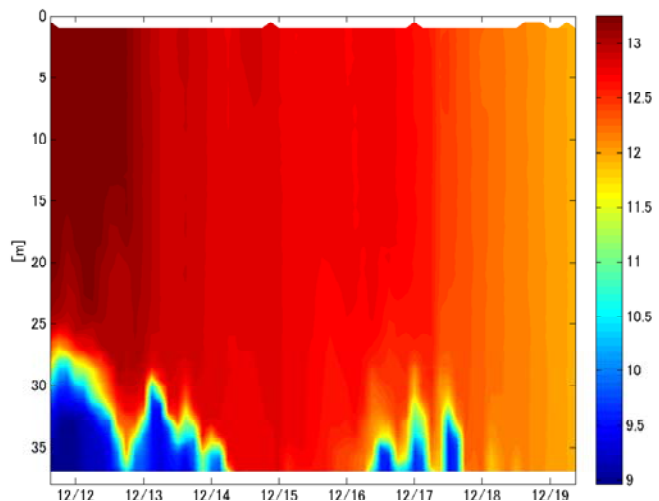

This new buoy, equipped with a winched rope inside, no longer needs a guide wire during the deployment. That's a unique point.

Up until now, this buoy has succeeded in profiling over 100 times in 95-meter water column (2m to the bottom) in the Lake Biwa. The following is one of the field trial results recorded in Dec. 2009, with 40-meter water column (2m to the bottom).

=Mooring Array=

Test result =Contour of Temp.=
